Gum, grease and dirt removed from drive thru lanes

Rotary Surface Cleaner and high pressure hot wash are used with eco-friendly cleaning products to safely clean build up of grease, dirt and debris.

Snowman crews remove dirt, oil, gum, mold, fire damage and other unsightly stains making the property look much nicer. Our goal is to provide you with the best quality cleaning service possible to improve the value and appearance of your property. Snowman power washing is one of the most affordable and simplest ways to increase your commercial property value. Having your driveways and store fronts clean and professional looking gives a positive impression to your customers.

KEEP IT CLEAN

Remove Mold, Mildew, Dirt, Grease and Debris

Cleaning Method

Snowman uses commercial grade professional equipment (up to 5,000 psi and 200° F water) and trained personnel to clean. Biodegradable degreasing cleaners are used to help protect the environment. The Rotary Surface Cleaner and hot water remove the dirt, oil and debris from the area better than using standard power washers. The surface is cleaned and completely rinsed, leaving the surface looking new. Using the proper equipment allows us to clean the area evenly, without damaging the surface and eliminating “zebra-stripes”. With the custom dual power washing setup, we use two operators and washers to do the job in a fraction of the time it takes using a home style pressure washer.

Walk Behind Washer

State of the art orbital walk behind surface cleaner used to clean commercial kitchen floors.

Top : Commercial restaurant kitchen floor that would not come clean.

Bottom Same floor after using walk behind surface cleaner with eco-friendly cleaning products.
