INCREASE EFFICIENCY AND PROFITS

Twin Cylinder with Hydraulic Down Pressure

Spreader
Compatible

"We've seen a definite time and labor savings using the Snowman pull plow....it works great on small, tight drives in the condominium complex. I now have one person in a truck as opposed to two on the Bobcats and we're doing a faster, more efficient job."

David Veron,
The Veron Company, MA

- The most rugged and versatile Snowman pull plow
- Wide-set mounting arms allow clearance for the plow to operate behind most V-box and tail gate spreaders
- Approved receiver hitch provided with each plow
- Eliminate back dragging and turnaround time required with all front mount plows
- Clean at least twice as many drives per hour with a Snowman plow without the added expense of another truck and driver
- Safer than back dragging because snow removal is performed while driving forward
- Exclusive High Lift reaches over drifts - eliminates hand scooping
- Carry a second load each trip across parking lots
- Superior cleaning with hydraulic down pressure
- Works great for tight areas and dead end applications
